
Another eTMF vendor made the software. But DRS migration services made the difference.

When a life science company purchased eTMF software for their clinical studies, they turned to a large software provider. When they needed a team of experienced eTMF staff to migrate the study and verify the content of the TMF, they turned to DRS.

The DRS Professional Services staff ensured that the integration proceeded efficiently, reliably and at the required quality level. Working with the sponsor, the DRS team identified and reported on GAPS and filing integrity issues so they could be corrected.

Case Study in Brief

White Paper Problem

- Sponsors acquire/sell product; the TMF is usually in multiple formats
- Sponsors' time evaluating study integrity and mapping documents with required metadata can be taxing
- Adding TMF management-specific resources for short time periods can be problematic
- Timelines for moving the TMF into an eTMF application are often demanding

White Paper Solution

- DRS resources include a team of immediately available TMF specialists
- Highly-trained DRS TMF Specialists arrive on day one bringing expertise in document quality, QA, DIA file structure and eTMF applications bring highly trained staff to the sponsor
- Sponsors can increase their TMF staff to enable the acquired study to migrate more quickly

Case Study Results

- With DRS as a TMF service partner, migration was completed within significantly shorter timeline
- Partnering with DRS reduced training time to a minimum and increased speed-to-implementation
- Sponsor benefited from DRS employees' expertise who work with the TMF every day
- Sponsor realized a shorter transition timeline with a full quality review
